DETAILED ACTION

1. This office action is in response to applicant's amendments filed on May 5, 2006.
2. Claims 11-15 and 17-21 are pending. Claim 11 is amended. Claims 1-10 and 16 are cancelled.
3. In view of applicant's amendments, the 35 USC 112, first and second paragraph rejections of claims 11-21 and the objection to the abstract of the disclosure are withdrawn.
4. Claims 11-21 stand rejected under 35 USC 103(a) rejection of claims 11-21 over (Romack et al. (US 6,200,352) in view of Octadecylamine document (www.ams.usda.gov/nop/nationalist/tapreviews/octadecylamine.pdf) for the reasons set forth in the previous office action. The rejection of the claims is maintained.

Response to Arguments

5. Applicant's arguments regarding the 35 USC 103(a) rejection have been fully considered but they are not persuasive. The applicants argue:

"Romack et al. clearly fail to provide any incentive to (i) select primary alkylarylamines and to use it (ii) in a concentration and (iii) under dry cleaning

conditions that in combination will produce a fluid dry cleaning composition in which at least 10% of the surfactant is undissolved."

The examiner respectfully disagrees. Romack et al. clearly teaches the use of any surfactant in the dry cleaning method (column 3, lines 35-40). Among the listed surfactants are ARMEEN™ primary alkylamines. The octadecylamine reference is only relied upon to clarify the structure of the ARMEEN™ primary alkylamines. All disclosures of the prior art, including non-preferred embodiment, must be considered. See *In re Lamberti and Konort*, 192 USPQ 278 (CCPA 1967); *In re Snow* 176 USPQ 328 (CCPA 9173). Nonpreferred embodiments can be indicative of obviousness, see *Merck & Co. v. Biocraft Laboratories Inc.* 10 USPQ 2d 1843 (Fed. Cir. 1989); *In re Lamberti*, 192 USPQ 278 (CCPA 1976); *In re Kohler*, 177 USPQ 399. A reference is not limited to the working examples, see *In re Fracalossi*, 215 USPQ 569 (CCPA 1982).

Regarding the claimed property of at least 10 or 30% undissolved solid surfactant, one of ordinary skill in the art would expect the octadecylamine in the prior art compositions to precipitate out in similar percentages to the instantly claimed values because the prior art teaches dry cleaning methods comprising similar cleaning compositions and similar treatment steps. The patent office is not equipped to measure levels of undissolved surfactant in the dry cleaning methods. Optimization of the levels of undissolved surfactant to the instantly claimed levels would be obvious, since optimization of a result effective variable only requires routine skill in the art. Furthermore, the applicant has not provided a showing of unexpected results. The rejection of the claims is maintained.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
